3b Calibration-bead center: XY and XZ sections
Sections through the first catalogue bead; nearest available planes, no interpolation or fitted-peak recentering

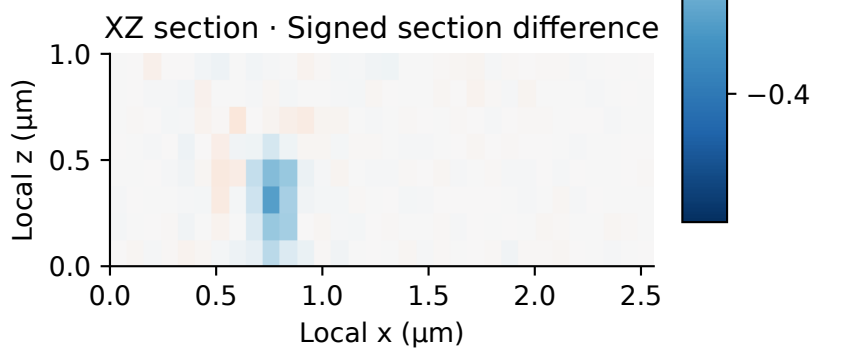

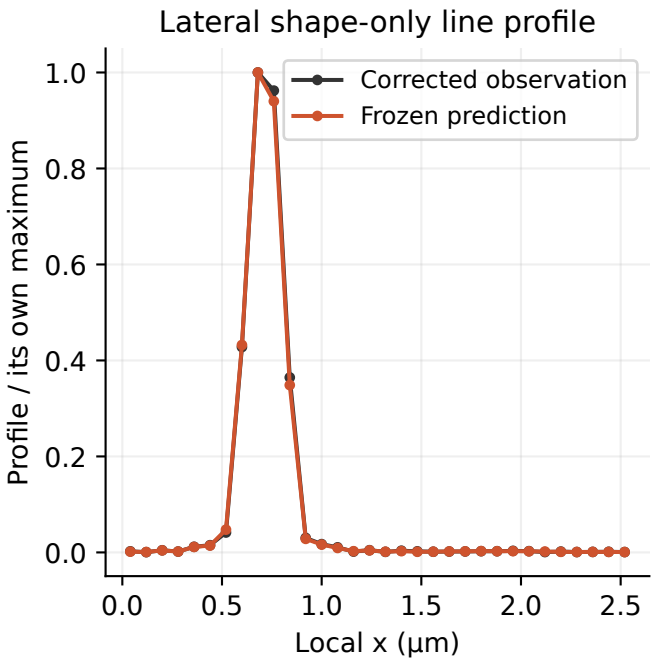

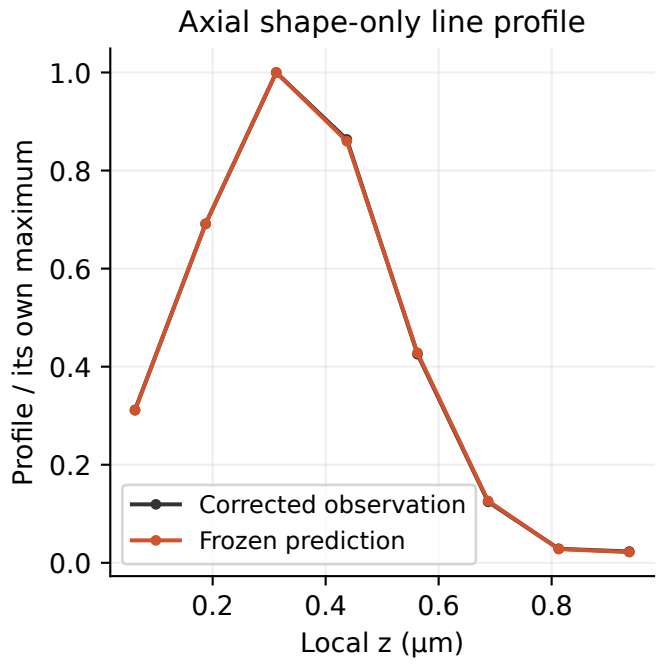

First catalogue bead (local µm)
z=0.3125, y=0.6000, x=0.7000

Actual section planes
XY: z=0.3125 µm
XZ: y=0.6000 µm

Main images: common quantitative scale.
Profiles: separate peak normalization,
shape only; no alignment or recentering.
