5b  Specimen-bead center: reconstructed source versus reference
Sections through the first catalogue bead; nearest available planes, no interpolation or fitted-peak recentering

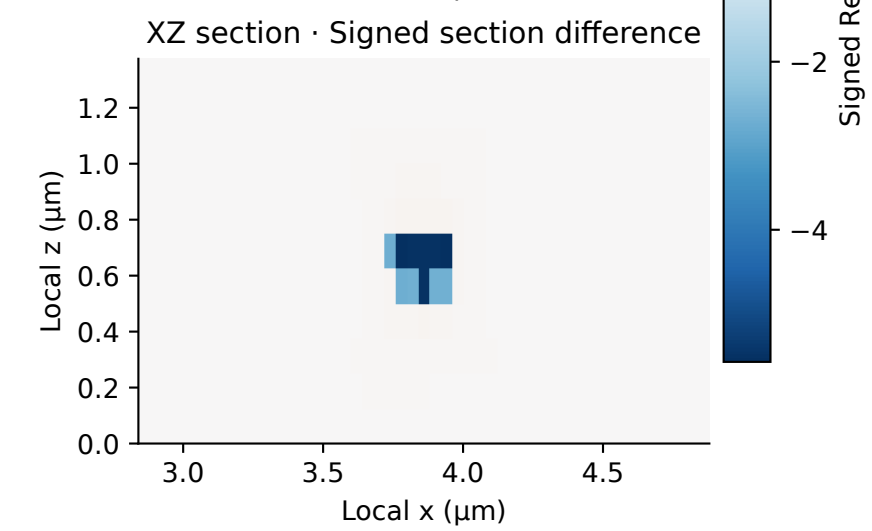

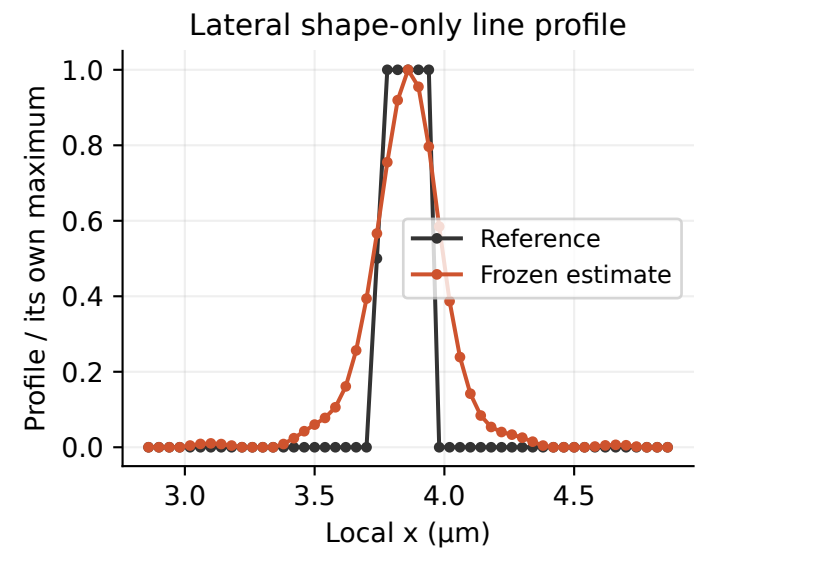

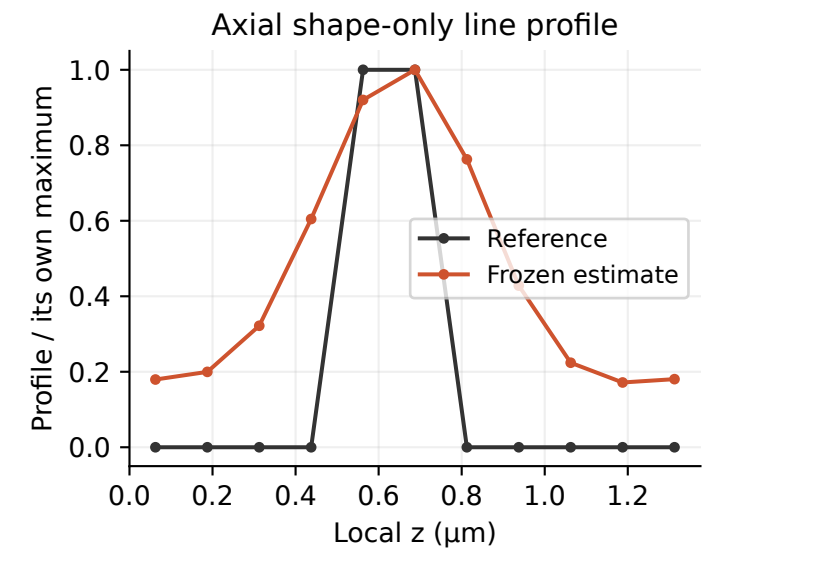

First catalogue bead (local µm)
z=0.6500, y=4.0500, x=3.8500

Actual section planes
XY: z=0.6875 µm
XZ: y=4.0600 µm

Main images: common quantitative scale.
Profiles: separate peak normalization,
shape only; no alignment or recentering.

Whole-volume peaks:
reference 5.714199
estimate 0.218990
